Experience

Mobile Software Developer	**Wine**	**September 2023–Current**

Hybrid, Espírito Santo, Brazil

- I developed the client's subscription management system using modern technologies, **replacing a legacy solution**. This project had a significant impact on the organization, streamlining integration with other essential company systems;
- I implemented a new commission flow in the e-commerce checkout, ensuring th**e primary commission-based revenue model** for hundreds of in-store sales representatives;
- I enhanced the Wine Digital Magazine experience, **used by thousands of customers across Brazil**, by developing a new PDF reader and adding features that **expanded the magazine's possibilities for the business team**;
- I contributed to several projects for Clube Wine, which has **over 700,000 members across Brazil**, including the implementation of opt-in/opt-out notifications for the club and improvements to the modality selection process and the club's checkout flow.

Front-end Software Developer (Volunteer)	**Lacrei Saúde**	**May 2023-August 2023**

Remote, Brazil

- I developed the core functionality for **healthcare professional search**, enabling users to search and filter professionals to find the one that best met their needs;
- I implemented **email and SMS-based registration validation** and collaborated on the development of the company's email interfaces;
- I refactored parts of the onboarding flow (multi-step form) to **simplify maintenance and facilitate the development** of new features within this flow;
- I actively participated in team meetings to discuss improvements and potential changes that would **streamline the platform's development**.

Front-end Software Developer (Volunteer)	**Python Norte**	**February 2023–July 2023**

Remote, Brazil

- I participated in the development of a landing page for the official partner **event of Python in the northern region of Brazil**;
- I took part in several meetings with the event's organizing team to define the structure and interface of the landing page.

Courses and certificates

- **Full Stack Software Development,** Rocketseat, Brazil. **2022–2023**
- **Full Stack Software Development,** OneBitCode, Brazil. **2022-2022**
- **Software Development Technical Course,** CEDTEC, Brazil. **2022–2024**

Education

- **B.Sc. Computer Science,** Estácio, Brazil. **2025–2028**
